eLine Tribrid DVR

Startup Wizard - Motion Configuration

Start-up Wizard: Motion recording configuration

When system has started, and the wizard is still enabled:

- Deselect 'startup' Click NEXT STEP [FIG. 1]
- Verify HDD is set to overwrite
- Click DATE&TIME Tab
- Configure your system date and time settings
- *Suggestion* Do not enable NTP unless required
- Click NEXT STEP
- Plug in a network cable, and select DHCP (to obtain an IP and verify the connection) [FIG. 2]
- Click NEXT STEP
- Click on the 'cog wheel' button on the right side of the screen [FIG.3]
- Deselect REGULAR and SELECT MD for Period 1 [FIG.4]
- Select ALL for all days, click SAVE
- Click COPY and apply to all channels
- Click FINISH
- Right-Click main screen choose MAIN MENU
- Login
- Click STORAGE icon > SETTINGS row
- Click RECORD in the left column [FIG.5]
- Select ALL button listed under MAIN STREAM - SCHEDULE (or may say AUTO)
- SAVE
- Right-Click to exit the Menu

System is now configured for motion recording
